About

Our Vision **"**

To be the preeminent provider of cybersecurity, cyber intelligence, and cybercrime investigation consulting and education services in the MENA region, empowering individuals and organizations to navigate the digital landscape with confidence and resilience.

Our Mission **"**

is to deliver state-of-the-art education and specialized consultation services across various fields of technology, including cybercrime, cybersecurity, financial technology, law and technology, and AI and emerging technologies. We aim to equip professionals and organizations with the knowledge and skills necessary to navigate the complexities of the modern digital landscape, ensuring they remain at the forefront of technological advancements. Through strategic partnerships, advanced training programs, and tailored solutions, we are committed to fostering a culture of excellence and driving

Founder

Dr. Mohamed El-Guindy is a leading cyber security expert and international speaker. He works as a cybercrime researcher, cyber terrorism expert, and consultant for international organizations. His work on cybercrime has been cited in several international publications.

Dr. El-Gindy has served as a consultant in cybercrime and information technology for the United Nations Office on Drugs and Crime (UNODC) since 2016, providing capacity-building training programs for law enforcement and criminal justice agencies in the Middle East, North Africa, and Europe. Moreover, he served as an information security advisor to the Assistant Prime Minister of the Egyptian Cabinet, the Information and Decision-Making Support Center, from 2020 to 2021. Currently, he works as the Digital Advisor to the Egyptian Public Prosecution Office, Cybercrime Consultant to the Egyptian Ministry of Interior and the Program Director of the Professional Master in Cybercrime Investigations at Faculty of Law, the British University in Egypt.

Since 2008, he has represented the Information Systems Security Association (ISSA) in Egypt. He also plays a key role at UNESCO, annually representing Egypt at their Information for All Programme (IFAP) conferences and contributing to global declarations relevant to technology, cyberspace, and artificial intelligence ethics.

Dr. El-Gindy is further involved as a member of the UNESCO IFAP Working Group in Paris.
Dr. El-Gindy maintains a strong media presence. Since 2014, he has hosted a unique TV program called "Tech Talk" on Al Kahera Wal Nas TV channel, focusing on technology and its impacts. This long-running program boasts over 300 episodes.
Notably, **Dr. El-Gindy** delivered a prestigious lecture on cyber warfare and social media at the 31st Educational Symposium of the Egyptian Armed Forces in 2019, speaking directly to H.E. President Abdel Fattah El-Sisi. He continues to share his expertise on cybercrime, information security, and artificial intelligence with security, judicial, and military entities.

Consultation and Training

At Technovation, we offer specialized consultation services in cybersecurity, leveraging our extensive expertise to help organizations protect their digital assets and maintain robust cybersecurity resilience and compliance. Our team of seasoned professionals provides tailored solutions to address the unique challenges faced by businesses in today's rapidly evolving digital landscape. We assist in developing comprehensive security strategies, implementing advanced threat detection systems, and ensuring compliance with international cybersecurity standards and regulations. By partnering with Technovation, clients gain access to cutting-edge knowledge and practical insights, empowering them to safeguard their operations against cyber threats, enhance their overall security framework, and achieve compliance with industry-specific requirements.

Our services include but not limited to:

GRC - Governance, Risk, and Compliance.

Due Diligence Investigations.

Open-Source Intelligence and Investigations.

Dark Web and Crypto Investigations and Consultancy.

Cutting-edge technologies and solutions for Law Enforcement, Intelligence, Defense and Corporate.

Training and Education

At Technovation, we provide cutting-edge education through a team of internationally trained and qualified experts. We offer a variety of educational programs, ranging from short courses to diplomas and internationally accredited qualifications. Our expertise in new and emerging technologies positions us at the forefront of training institutions in Egypt and the MENA region. As the sole and exclusive representative of the London College of Sciences and Technology (LCST), we are a leading training institution that meets international standards of quality education and training. At Technovation, you can find career-oriented programs that align with the latest technological advancements, opening unique job opportunities.

Technovation delivers training both online and on-site, providing flexibility for learners. Our programs combine theoretical knowledge with hands-on practical exercises.

Our Training Partner

LONDON CYBER SCIENCE
AND TECHNOLOGY ACADEMY

Cybercrime

Technovation offers specialized training in cybercrime investigation and prevention, designed for law enforcement, digital forensics professionals, legal professionals, corporate security teams, and IT professionals.

Our programs are distinguished by their unparalleled expertise. Developed by our founder, a renowned cybercrime expert and UN figurehead, who is also the architect of the Professional Master in Cybercrime at a leading British University in Egypt, our curriculum is at the forefront of the field.

This unique blend of academic rigor and real-world experience ensures that our participants gain a deep understanding of the evolving cyber threat landscape.

Our training focuses on understanding the tactics of cybercriminals, identifying digital footprints, and utilizing digital forensics to build robust cases.

Participants will gain invaluable insights into the cybercrime ecosystem and learn to effectively counteract emerging threats.

Cybersecurity

Technovation offers comprehensive cybersecurity training programs designed to safeguard individuals and organizations from the ever-evolving threat landscape.

Our curriculum is meticulously crafted to provide a deep understanding of cybersecurity principles, technologies, and best practices.

Our training is tailored to meet the needs of a diverse audience, including IT professionals, cybersecurity specialists, business leaders, and general employees.

Financial Technology – FinTech

Technovation offers specialized Fintech training programs designed to equip professionals with the knowledge and skills to navigate the rapidly evolving financial technology landscape.

Our curriculum is meticulously crafted to provide a comprehensive understanding of Fintech trends, technologies, and business models.

Our training programs cater to a diverse audience, including financial institutions, startups, investors, and technology professionals.

Law and Technology

The convergence of law and technology has created a complex landscape with profound implications for businesses, governments, and individuals.

Technovation offers specialized training programs to navigate this intersection effectively.

By combining legal expertise with a deep understanding of technological advancements, our curriculum addresses critical areas such as cyber law, intellectual property, data privacy, e-commerce, and digital contracts.

Our training programs are designed to equip legal professionals, IT professionals, and business leaders with the knowledge and skills to thrive in the digital age.

AI and Emerging Technologies

Artificial Intelligence (AI), Blockchain, Internet of Things (IoT), Data Science, Virtual and Augmented Reality (VR/AR) are reshaping industries and societies at an unprecedented pace.

Technovation offers specialized training programs to equip professionals with the knowledge and skills to harness the potential of these transformative technologies.

Our curriculum covers the fundamentals of AI, machine learning, deep learning, blockchain technology, IoT, data science, analytics, VR/AR, and the ethical implications of these technologies.

Technovation's AI and Emerging Technologies training empowers professionals to become innovators and leaders in the digital age.

Our programs combine theoretical knowledge with practical applications, enabling participants to develop innovative solutions and drive business growth.

Success Stories

With over **20** years of experience in the fields of training, education, and cybersecurity, Technovation has consistently delivered cutting-edge services to individuals and corporate clients. Our extensive background in corporate services and training has uniquely positioned us to serve businesses and professionals alike, maintaining the highest standards in both training and capacity building, as well as consultation.

Throughout our journey, we have successfully partnered with a diverse range of clients, including multinational corporations, government agencies, and educational institutions.
